WISY Rainwater Harvesting

The multifunctional cover set.

The WISY multifunctional cover consists of an aluminium cover, a child safety lock with storage compartment and a water plug (Gardena) with stop valve for connecting a submersible pump. The storage compartment can be used for a hose or a suction pump (clear height 35 cm). There is a recess for the suction line. There are also two recesses for easy removal of the child safety lock. The child safety lock is screwed to the concrete cistern using the two lugs. It is designed as a spring element in a conical design in order to compensate for possible tolerances in the cistern ring diameter. Thanks to the simple attachment of the child safety lock, maintenance of the built-in filters and other cistern technology is possible without effort. The aluminium cover with protection against sideward sliding weighs just 3.3 kg and can therefore be lifted off easily. The cover is available in natural aluminium.

1. Aluminium cover is passable on feet

- Colour: natural aluminium
- Non-slip surface
- Outside diameter 73 cm.
- One handle in the centre
- Weight: 3.3 kg
- With 2 holes to screw the lid on directly as a child safety lock
- protection against sideward sliding on the underside, diameter approx. 59 cm, height 4 cm.

2. storage compartment with child safety lock

For access openings with an internal diameter of 60 to 63 cm. If the cone diameter of the cistern is smaller, this can be adjusted using concrete levelling rings with an internal diameter of 62.5 cm.

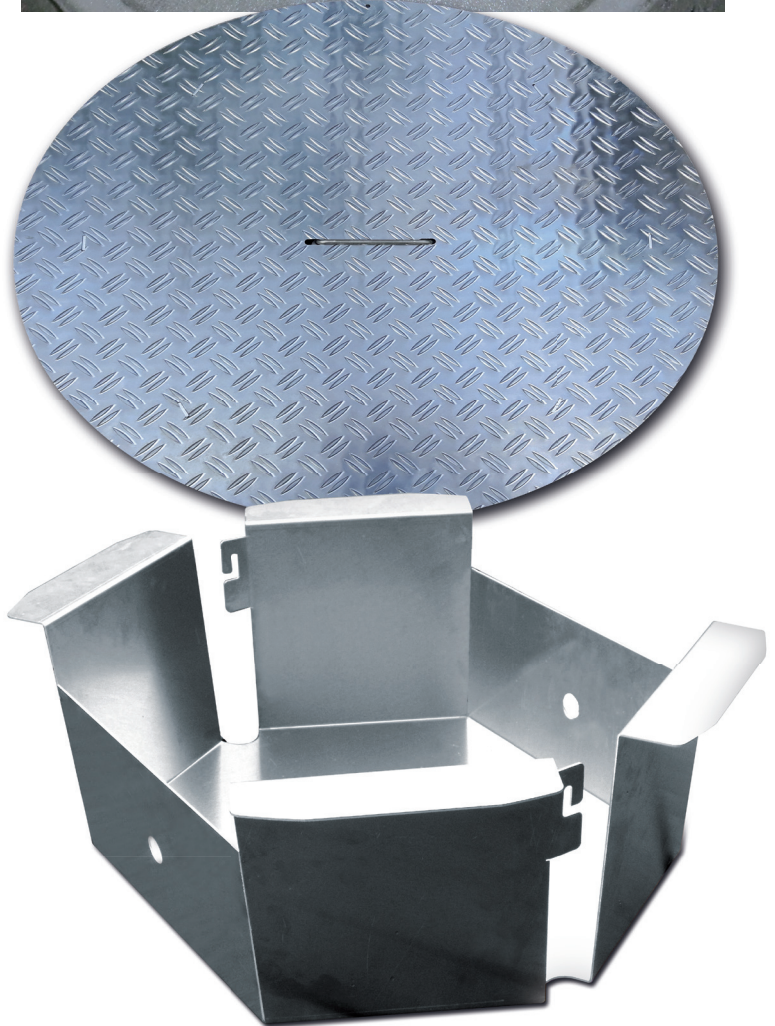

The storage compartment is attached to the concrete cistern at 2 fixing holes using the stainless steel screws supplied. This fastening is essential for the child safety function.

- Material Aluminium
- 2 stainless steel screws and dowels for fastening to the concrete cistern
- Length 40 cm and width 42 cm, clear height to lower edge of lid 35 cm

3. water plug with stop valve

The water plug is attached directly to the storage compartment and has a $\frac{3}{4}$ " nozzle facing downwards for connecting the pressure hose of a submersible pump.

- Water plug with stop valve and $\frac{3}{4}$ " nozzle (Gardena).

Multifunctional cover and hose storage

- Height 35 cm lid colour natural
